THE HISTORY OF STEAM!

4:30PM-6:00PM Pullman Car 1

STEAM: as Steampunks we love it, but do we really know what it is, why it's useful, and what cool stuff has been done with it? We will learn about types of steam; how it can kill and destroy; interesting uses; how to go fast; and why carrots don't cook in Denver. Whether you're an author, maker, or simply want a better understanding of our core element, this is the panel for you! *Herkimer Hoodlum B.S. M.S. P.E.*

AROUND THE WORLD IN UNDER 80 DAYS!

4:30PM-6:00PM Pullman Car 2

On Thursday, November 14th, 1889 (our Thursday in TeslaCon time--), sensational reporter Nellie Bly was dispatched to circle the globe and beat the time of Jules Verne's Phileas Fogg. BUT—so was Elizabeth Bisland, another young woman writer, who went westward on the same challenge. Who were they? What did they see in their largely non-stop 24,800+ miles? Did they both succeed? And what happened afterward? *Georgie Schnobrich*

TESLACON: HISTORY! IMMERSION EVENT

4:30PM-6:00PM Pullman Car 3

HRH Hastings II takes you through ten years of stories, fun and "almosts" and explains why his imagination is usually above the budget of the convention. Or what it could have been like, if we had the 10 million dollar budget.

1:30PM-3:00PM Lecture

While recycling may seem a relatively new concept, it has in fact been around for thousands of years. It wasn't until the Industrial Revolution of the "Victorian era" that it became cheaper to discard and purchase new. As Hatton Cross Steampunk creates fun personas and contraptions from this era, we also attempt to create a "green movement" as well. In this presentation David encourages the Steampunk enthusiast to re-use items that may be considered ordinary junk. He explores creative uses of everyday items, flea market finds and all around junk to create Steampunk works of art. David will display several of his creations and explain some of the obvious

and not-so-obvious items that create the “Contraptions of False Perception”. This presentation is ideal for the Steampunk enthusiast that is on a tight budget; those that are searching for inspiration and ideas; or those artists that wish to utilize more “found items” in their art. David will also discuss easy ways to incorporate low voltage electronics to enhance your projects and whole-heartily invites you to be a part of this “Green Steam” movement.

VICTORIAN MEDICINE A REVOLUTION IN SCIENCE

12:00PM-1:30PM Pullman Car 3

Have a cough? Try some morphine. Looking for a gift for that special someone? How about a gold syringe? Have you read the morning paper - some quack says diseases are caused by tiny beasts called germs! The Victorian era was one of rapid scientific change in many areas of western society. Germ theory, and the advent of antiseptic technique forever changed the practice of medicine.

As a Nurse Practitioner I find it fascinating to study where we have been and compare it to the standards of today. This presentation will go into the history of Victorian medicine and discuss some of the more peculiar practices of the past. *Virginia Rady*

ASK SHERLOCK

SUNDAY, NOVEMBER 10, 1889 GREETINGS, READERS. MY NAME IS SHERLOCK HOLMES. NORMALLY, I ALLOW MY COMPANION, DR. JOHN WATSON, TO HANDLE MY CORRESPONDENCE, BUT DUE TO A RECENT COURT-MANDATED CONFINEMENT WITHIN MY QUARTERS, I HAVE DISCOVERED THE PRESENCE OF MIND TO RESPOND TO SOME OF THE INQUIRIES OF MY MORE OVEREAGER DEVOTEES. I SHALL ENDEAVOR TO DO SO WITHIN THIS ESTEEMED PERIODICAL, AT LEAST UNTIL MY BROTHER DEIGNS TO WIRE THE NECESSARY FUNDS FOR BAIL, OR I CAN DISASSEMBLE THE LOCKING SYSTEM THE POLICE HAVE PLACED UPON MY WINDOWS.

Dear Mr Holmes...

All my quills have gone missing. I suspect feline or dandy involvement, each for entirely different reasons. I'm fairly certain to catch the dandy I would leave out an assortment of dashing cravat pins. But how would I go about catching a feline in the act?

Jessica D., Acclaimed Author, Cat Fancier, and Dandy Enthusiast

You would be amazed how much overlap exists in the desires of both cat and dandy. The key difference being, while a dandy will abscond with your quill so as to write dreary poetry about the joyless, Caligulan excesses mandated by their upper-class social calendar, the feline will more often simply knock the quill and inkwell off the table and consider their duty fulfilled.

I recommend searching upon the carpet under the table for the missing quills. Failing that, place a fine wineglass under a weight-activated cage in your study. It shall bait and ensnare both dandy and feline - the former shall approach it so he may titter at the empty decadence it signifies, the latter so she can knock it over.

Dear Mr. Holmes, I fear that my fiancée may be unfaithful to me. You see, she's always out on her bicycle, and I heard that the contraption can give women strange ideas about freedom and excess. How can I deter her from it?

Max J., Aeronautic Explorer

You've made two grave errors - firstly, in possessing such a satanic contraption, for no man nor woman was meant to travel at such a speed in any environment where automobiles are present. Having known more than my share of London's auto enthusiasts, I say it is only a matter of time before you're minced into black pudding by some drunken teamster if you continue to make use of such an instrument.

Secondly, your wife is almost certainly

having an affair, but depending on your attitude towards her, the first issue may well solve the latter.

Dear Mr. Holmes,

Where are my spectacles?

Susy L., Avid Motorist

Consider glassing your eyes, they are much more difficult to lose.

Dear friend,

Do you think a gal who travels around for her job would ever be happy settling in one place after marriage?

Sir Earl Gray, Actually An Octopus

The minds of women are a mystery to me, but the behaviors of octopodes more logical.

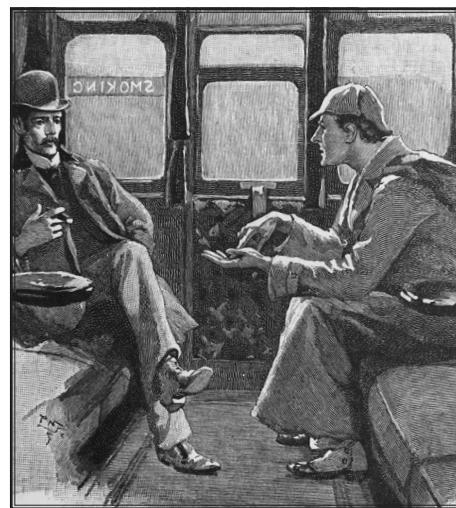

Consider creating a superior garden to attract this fine female invertebrate, decorate it with shiny rocks and bits of shell and the latest gramophone records from Barry Manilow. Consider demonstrating your spiritual convictions with a nice shrine to Cthulhu, decorated with ichor and human skulls. Give thought also to what public schools are within easy distance of the garden - women cephalopods appreciate the kind of forethought where they won't need to concern themselves over how many hundreds of their spawn might be devoured by pistol shrimp whilst returning from lessons. All of these things combined should promote a mutual willingness to settle down.

If all else fails, secrete male hormones into your strongest tentacle, tear it off, and present it to her with a nice cheese plate. This demonstrates commitment, which I am assured women enjoy.

Dear Mr. Holmes, where do all those socks go?

Paul A., Storyteller and Popular Entertainer

As near as I can determine, there is a

nationwide network of sock thieves who have dedicated themselves to removing individual socks from laundry baskets and replacing them with unused spoons.

Esteemed Mr. Holmes

Someone within my office of employ keeps eating others' lunches. We cannot identify the dastardly culprit. The laxative trick provided no discernible identifying behavior modification, nor did the mousetrap in the brown bag produce any tell-tale snapping noise. We are far too engaged with errands to employ a full-time station guard, so I turn to you for tips. How to identify such a scoundrel?

Chris W., Very Hungry

Finally, a case of some substance!

I recommend laying a dangerous but unobtrusive trap near the icebox. Some manner of mechanical grasping device should serve, a phlogiston detonator would likely impact the surviving lunches. A bear trap, perhaps, could be disguised as a discarded shoe or tasteful flower arrangement upon the floor.

Failing that, you could begin poisoning the lunches. If someone does not return to work the next day, you have your

culprit.

This is a tricky one. I'll give you Watson's postal address so we may communicate.

Mr. Holmes,

I've been a huge fan of your column and escapades for quite a long while (Excellent job sticking it to Scotland Yard). Your intellect, resourcefulness, and commitment to truth all lead me to believe that you alone can unfold this mystery: Is Mr. Watson available, and more importantly, what is his type?

Thank you. Doctor Watson is rarely available, as most days he is off practicing medicine or resetting my bones after an explosion in my lab.

I'm unsure what you mean by "type" so I shall offer all the options I know:

- Sport: association football
- Flower: peony
- Alcoholic beverage: white wine with club soda
- Music: Baroque, latin jazz
- Tea: earl gray
- Font: papyrus
- Fish: icelandic cod
- Sexual partner: curvaceous female blonde
- Seasoning: smoked paprika

Dear Mr. Holmes-

Bobbins has lost his mustache. It was last seen crawling onto the Orient Express in a futile attempt to escape. Please advise.

Ann F., Bun Seller, Definitely Not SWARM.

While I detest SWARM with every moral, intellectual, physical AND metaphorical bone in my body, I find common ground with them on the topic of Bobbins mustache. I must reluctantly but enthusiastically absent myself from this case for the good of the empire. That mustache is in a better place.
